

Renfert Duomix

DENTSPLY announces the perfect pair: Aquasil Ultra DECA Smart Wetting® Impression Material and Renfert Duomix. The Renfert Duomix is the easiest and fastest way of getting the bulk benefits of Aquasil Ultra DECA™ 380 hard cartridges offering a faster start, faster finish, and an indispensable difference.

The fast start delivery is a combined result of the Renfert engineering and Aquasil Ultra DECA 380 cartridges. Aquasil Ultra provides an even faster finish with a comfortably long working time, but with an overall short setting time (MRT) compared to other impression materials.

Aquasil Ultra DECA 380 is a robust and easy 1-component cartridge system. The DECA 380 cartridges provide more material (380ml). But when “empty”, Aquasil Ultra DECA 380 cartridges have less than 2ml of material residue inside.

The Duomix is offered in a DENTSPLY partnership with Renfert GmbH. For 80 years, Renfert has provided German quality craftsmanship and small equipment to dental laboratories.

For further information please contact your Local DENTSPLY Territory Manager or call 1300 55 29 29.
